

## Stay Secure – Change your Password

Your messages and documents stored with Telix is an important asset for your company. Telix is doing a great job to secure your data from unauthorized access; using strong passwords will enhance the safety of your data.

Changing your password with OMNi is simple and takes less than 1-2 seconds, here is how:

Select  
**Change Password below logout**  
or  
**Tools | Login | Change Password**

A screenshot of the 'Change password' form in the OMNi application. It contains three input fields: 'Old password:', 'New password:', and 'Confirm password:'. Each field has a password strength indicator (dots) and a toggle icon (eye) to show or hide the password. A blue 'Change' button is located at the bottom of the form.

Some tips for better password security:

- **Choose a strong password**  
Make it a least 8 characters long and have a combination of letters, numbers and other characters can help make your passwords more difficult to crack
- **Create a password you'll remember**  
If you want to create a password that's easy to remember, but hard to guess, try creating a password out of a phrase. Take a phrase that has meaning to you and use the first letter of each word to create the unique password. For example, the phrase "Between the Devil and the deep blue sea!" would become the password "BtDatdbs!"
- Don't use your username as password (i.e. ts ts) or **common passwords** like: 123456, qwerty, password, secret, george, helen, niki, stella and alike.
- Use **different passwords** and change them often  
If you use the same password for multiple online accounts, you're putting yourself at risk (especially if you're using the same password for your social media accounts as you are for online banking)

*LgMAR is a software company founded by a team of dedicated experts in computer science and maritime business, to develop highly specialized software in the area of telecommunications. LgMAR is recognized as a leading company in communications software with several hundreds of installations and thousands of satisfied users. Clients are based mainly in Greece, but also in a number of other world regions (Europe, North and South America, Far East, Middle East) mostly in the Shipping related section (Ship Owners, Ship Managers, Ship Brokers, Ship Agents, Operators, Banks, Insurance Brokers, Manning Agents, Transport Companies, etc.)*
