

A new Omni module is available with information about all ports and UN/LOCODE locations used in trade and transport. You may search for ports within a maritime area, country, type, facilities, services and many other details; browse ports on the map or list.

Ports are fully integrated with Omni (i.e. positions, address book etc.) and provide smart linking to external services for maritime traffic, general information, weather, geolocation details, time and then some more.

LgMAR is a software company founded by a team of dedicated experts in computer science and maritime business, to develop highly specialized software in the area of telecommunications. LgMAR is recognized as a leading company in communications software with several hundreds of installations and thousands of satisfied users.
